Small size company (under 50):
HUONE Events Hotel

HUONE Events Hotel is a hotel like event venue for business events and meetings.

- HUONE was founded in 2012 by Evon and Jussi Söderlund
- HUONE employs 12 people in Finland and 10 in recently opened office in Singapore. In Finland, HUONE has employees from 5 different nationalities.
- HUONE has always identified itself as an international company by culture. The team brings most value to company's customers and business. The whole team enjoys working in a mixed group where they can learn different cultures and different ways of doing from each other. The mindset of HUONE is to grow into a global company and despite being a small, the whole diverse team shares the same vision of going international.
- More information <https://www.huone.events/>

Medium size company (50-250):

JS Suomi Oy

JS Suomi is specialized in MultiMedia Brochures that have been customized specially for client's needs.

- JS Suomi is part of a multinational corporation that operates in 11 different countries
- The branch in Finland was opened in 2009, and currently there are 58 employees in Finland
- The first employee with foreign origin was hired in 2010 and now around 15% of personnel comes from foreign origin
- More information <http://www.jssuomi.fi/uk/>

Big size company (over 250):

WSP Finland Oy

WSP is a multidisciplinary consultancy company providing sustainable services in engineering, consulting, surveys and design. WSP's core competencies Environmental Architecture and Structural Design.

- WSP in Finland is part of global WSP and employs over 500 employees in Finland.
- At WSP, the multiculturalism stems first and foremost from the diversity of different fields of engineering: people with different skills and professions work together in same projects. The language and cultural backgrounds of the personnel vary, and English is heard on every day basis. Employees and talents coming from outside Finland are crucial for WSP, that operates in a field with need for workers.

Honorable mention:

BlueFors Cryogenics Oy

BlueFors specializes in state-of-the-art ultra-low temperature cooling systems, used especially for scientific research in the field of quantum technology

- The company was founded in 2008 by Rob Blaauwgeers and Pieter Vorselman
- BlueFors employs around 80 people, from which 16% is of foreign origin
- There are people from 10 different nationalities working in the company
- From the very beginning, it has been clear for BlueFors that person's background doesn't matter. What matters is the skills and qualifications, and how well the person fits into the team and organisational culture. This is the best way to get the best brains. Diversity creates ability to change, brings new perspective, and is fun. This company has succeeded in creating invincible combination from the best aspects of Finnish higher education and work ethic and international sales and innovation know-how. The personnel enjoy working in inclusive and open atmosphere.
